VOL. VII, NO. 341. HONOLULU, HAWAII TERRITORY, SUNDAY, JULY 11, 1909.—SIXTEEN PAGES. Entered Jan. 19, 1908, at Honolulu, Hawaii, as Second Class Matter, Under Act of Congress of March 3, 1879.

LAWLESS ACT OF WAIPAHI STRIKERS

Japanese Laborer Is Held Prisoner Till Rescued.

That the lawless element among the strikers do not intend to obey the order of the court in regard to intimidation unless absolutely forced to, was demonstrated late yesterday afternoon at Waipahu when two Japanese, anxious to return to work, were waylaid by pickets and threatened. Officers of the law had been advised of the intention of the two men to return to work, and were on hand to afford the protection. Nevertheless one was held prisoner for a short time.

The imprisoned laborer was soon released and was escorted to a place of safety, while six of his jailers were placed under arrest and brought into Honolulu, reaching here about 2 o'clock this morning.

The Higher Wage Association has established a picket system at Waipahu, and all strikers desiring to visit the plantation have been required to secure a pass from the Higher Wage Association in this city. One of the men involved in yesterday's trouble procured such a pass, explaining that he thought that it would help him get by the picket. He was lost somewhere in the shuffle.

The other Japanese was taken in tow and escorted to the office of the Higher Wage Association, where endeavors were made to dissuade him from going back to work. He was rescued by Manager Bull and Officer Scoville.

BURGLAR ROBS JEWELRY STORE

\$300 Watch and Forty Rings Stolen by the Thief.

The jewelry store of Sang On Kee on Maunakea street was broken into some time Friday night and a large amount of jewelry was carried away by the burglar or burglars. The value of the property stolen, so far as can be estimated at present, amounts to about \$600. Among other things that are missing are forty gold rings, two gold watches, several other watches and a large number of miscellaneous articles, including twenty-five Kalakaua 25-cent pieces and eight Kalakaua 50-cent pieces.

One of the watches that was taken is the gold watch formerly owned by Wong Kwai, a wealthy Chinese now deceased. This watch, which is valued at \$300, had been sent to the store by Wong Kwai's son to be repaired.

The burglar broke in at the rear of the place, prying apart the bars of one of the windows with a hatchet. When the store was opened early yesterday morning, it was found that the back door was open and that the shop had been thoroughly ransacked.

Chief of Detectives Leal has a pretty strong suspicion as to the identity of the burglar, the work bearing the earmarks of having been done by a Chinese who is considered an expert in that line. No arrests have been made as yet, however.

LORD KITCHENER'S SUCCESSOR IN INDIA—GENERAL SIR O'MOORE CREAUGH, V.C., K. C. B.

General Sir O'Moore Creagh, V. C., K. C. B., will succeed Lord Kitchener as Commander-in-Chief in India. He will have control of nearly 400,000 troops, and a territory of about 2,000,000 square miles. The new chief is an Irishman from County Clare, and has just reached his sixty-first birthday. He joined the army forty-three years ago, and won his V. C. in the Afghan war of 1879. Forty years of his service have been spent in the East.

EARTHQUAKES STIR PARTS OF SUNNY FRANCE

They Occur in the Aix District and Cause a Panic—Sugar Scandal Brings on Suicide—Spain at Melilla.

(Associated Press Cablegrams.) MARSEILLES, July 11.—Several earthquakes in the Aix district have caused a panic. People are camping in the streets.

SUGAR MAGNATE'S SUICIDE

TOKIO, July 11.—Sakao, the convicted president of the sugar company which was involved in the recent scandals has committed suicide by shooting.

CHOLERA IN ST. PETERSBURG

ST. PETERSBURG, July 11.—There are 124 new cases and 47 deaths of cholera in this city.

SOLDIERS FOR MANILA

MADRID, July 11.—A brigade of infantry, artillery and cavalry has been embarked on a cruiser and transport and ordered to Melilla.

CZAR LEAVES POLTAVA

POLTAVA, July 11.—The Czar has departed for Kiev.

BIG DAY IN LOS ANGELES

LOS ANGELES, July 11.—Seventy-five thousand visitors are expected at the Elks' gathering today.

FLEET AGAIN COMING

WASHINGTON, July 10.—The first and second divisions, first squadron, of the Pacific fleet, consisting of the armored cruisers West Virginia (flagship), Colorado, Maryland, Pennsylvania, Tennessee (flagship second division), California, South Dakota, and Washington, and auxiliaries, will leave the Pacific Coast in a few weeks for an extended cruise in Asiatic and Philippine waters during the autumn and winter months.

Rear-Admiral Uriel Sebree, who will be in command, is now busily engaged in perfecting plans and arranging the details for the visit.

HENEY TO ALASKA

SEATTLE, July 10.—Francis J. Heney sailed from this port today on a trip to Alaska.

BOTTLE CONTAINING MESSAGE FOUND ON SHORE OF OAHU

At 3 o'clock in the afternoon of November 15, 1908, a seaman dropped overboard from the British bark Haddon Hall, bound from Liverpool to Vancouver, via Cape Horn, a bottle containing a message.

At 3 o'clock in the afternoon of July 8 the bottle was picked up on the shore of Oahu, near Laie Settlement, by a Hawaiian named Logan.

When the bottle was cast into the sea the vessel was some distance off the California coast about opposite to San Diego on a direct line between Honolulu and the California port. The message, which is somewhat discolored by water, but perfectly legible, reads as follows:

"Barque Haddon Hall,
"Sunday, November 15, 1908.
"Bottle thrown over at 3 p. m.
"At noon—Lat. 29 deg. 47' N., long. 132 deg. 09' W.
"One hundred and four days out from Montevideo. All well. Wind westerly and very light.
"(Signed) J. H. SCOTT."

According to the Maritime Register the bark Haddon Hall, 1332 tons, commanded by Captain Fookes, sailed from Liverpool on April 2 of last year and left Montevideo on August 3, arriving at Vancouver on December 14, 1908, or just a month after the bottle was cast overboard.

It is the custom of masters of ships to throw bottles containing messages overboard, and requests are made that when such bottles are found that proper authorities be communicated with so that the information may reach not only those personally interested in the vessels, but the United States Hydrographic Bureau and its branches, and the weather bureaus, so that data may be compiled as to the drift of ocean currents. In this case from the time the bottle was put into the sea until found nearly eight months elapsed, although the bottle may have been upon the shore for some time before its discovery.

POSTER IS ORDERED FOR PINEAPPLE DAY

Secretary H. P. Wood, of the Promotion Committee, is working out the particulars for his proposed "Pineapple Day" fete. He has requested H. M. Mist, the designer of the Floral Parade poster, to prepare a tentative design for a poster to advertise the occasion.

Should the plan go through, Wood hopes to have the feast set for the middle of August. At that time of the year he believes that it would be possible to secure a large attendance from the mainland, particularly of school teachers.

The suggestion is made that a military tournament might be held at Waiahua, the troops at Schofield Barracks being asked to participate. Field sports, swimming races, and the like, would also be included in the program.

But the great feature of the occasion would be the pineapples. The luscious fruit would be in evidence on every hand, and the fortunate visitors from the mainland would have an opportunity to enjoy themselves to their fill on the juicy product of Waiahua's plantations.

KLUEGEL JOINS HILO RAILROAD

Will Be in Charge of the Extension to Hakalau, Hawaii.

Charles H. Kluegel has decided to sever his connection with the Department of Public Works and accept a position that has been offered to him as the engineer in charge of the extension of the Hilo railroad to Hakalau.

Mr. Kluegel was in charge of the Department of Public Works during the absence of Superintendent Marston Campbell on the mainland, and during his tenure in office as assistant to Mr. Campbell has earned an enviable reputation for efficiency.

When the reorganization of the Department of Public Works was made necessary through the consolidation with the departments of land and survey it was stated that Mr. Kluegel would assume charge of the construction of the Kula pipe line.

Mr. Kluegel will take up his new duties at once, the extension to Hakalau being assured without delay through the announcement made yesterday that the Hilo Railway Company had authorized the sale of \$800,000 worth of stock for the purpose of financing the proposed extension. It is stated that the same amount of bonds will be issued and enough sold to pay for the fifteen-mile extension.

Mr. Kluegel was formerly in the employ of the Oahu Railway & Land Company and also the Hilo Railway Company and has had considerable experience in the kind of work he will undertake in his new position.

POSTOFFICE AT WAHIAWA ROBBED

Thief Rifles Cash Drawer but Does Not Molest Stamps.

Some time Friday night a burglar forced his way into the postoffice at Waiahua, helped himself to the contents of the cash drawer, and then made good his escape, leaving no trace behind him.

The robbery was discovered yesterday morning by Karsten Chott, the clerk, when he opened the office. Though a large amount in stamps was at hand, the midnight marauder had not touched them, evidently fearing that they might prove incriminating evidence, were he to fall into the clutches of the law.

Entrance to the postoffice was secured through a window, a "jimmy" evidently having been used to force the cash loose from its locks. The clerk does not sleep in the postoffice, his room being in the clubhouse of the Consolidated Pineapple Company, some distance from the scene of the robbery.

Chott at once reported the robbery to Postmaster L. G. Kellogg, who returned from the mainland only Thursday last and had not yet visited Waiahua. Kellogg reported to Inspector Hare.

The police believe that they have a clue to the identity of the burglar, a suspicious-looking character having been noticed in the vicinity of the postoffice Friday evening.

About a year and a half ago, the Waiahua postoffice was robbed, the thief being shot and killed just as he emerged from the building with his booty.

DISCONTENT IS THEME OF TALK

Dr. Green Delivers Stirring Arraignment of Old Philosophy.

Discontent, not the discontent that causes folk to sit and weep over the fact that they can not soar to realms above, but the discontent that prompts endeavor, that spurs the soul onward to achievements, was the topic of a stirring appeal by Dr. Thomas E. Green at the Opera House last night. It was a sermon, a sermon of real life, that the speaker delivered.

The fire of the evangelist, the zeal of the monastic priest, and the deep erudition of the scientist were all rolled into one in the succession of moral lessons which Dr. Green preached to his hearers.

Dr. Green said, in part:

"You have been taught, since first you began your individual training, that contentment is one of the greatest virtues that mankind can possess. It is a slap in the face of conventionalized, accepted philosophy, when I preach to you the doctrine of discontent as the means of accomplishing things.

"It was not so long ago that man had to be contented whether he would or no. Man's sphere was narrow, he, of necessity, had to be satisfied with his surroundings.

"To the early man it was impossible to imagine anything that did not correspond to something that he was acquainted with. The mountain had its giants, giants whose rough games caused the thunder which disturbed his slumbers. Even the gods of the early man were simply magnified creatures, possessing all of his particular virtues and his shortcomings. The god of the early man was a magnified human. Every phenomenon was the work of some god, built in human image.

"An early man was possessed of fever. To him it was but the work of scores of devils, despatching through his body and taking delight in pricking and prodding him with their fiery darts. Man could do nothing but bow in contentment to his fate and make the best of it.

"The wonder is that, in his struggle for existence, the primitive man ever found time to begin the study of creation. It was only discontent which prompted him. Do you realize what he had to overcome?

"Modern science has devised instruments so delicate that a microbe one one-hundred-and-fifty-thousandth of an inch can be detected. Were I to take a wheel, seven feet in diameter, start it going at the rate of 365 revolutions every five seconds, and place that little microbe upon it, I should put before you an example illustrating the relation of the human being to this great world of ours. To that little microbe each revolution would be equivalent to one day. Five seconds would be equivalent to man's four score years and ten. What chance would that little microbe have to study the reason of it all?

"The old Greeks had a legend that the first discovery of man was fire. If that be true, he must have discovered it on some magic isle like yours in the south, where a great volcanic fire had been sold out rapidly.

MIST TO BOOST FLORAL PARADE

Letters for European Mailing Go on Tenyo Maru Today.

When the Tenyo Maru sails for the mainland today, she will carry 500 addressed envelopes and letters to H. M. Mist at Dresden. To Mr. Mist has been delegated the task of mailing the Floral Parade postcards over Europe, and all of his supplies, minus postcards and stamps, go by the Tenyo.

Secretary Wood of the Promotion Committee has prepared a list of 500 names, covering the chief cities of Europe, and this list will be sent to Mist for his guidance in sending out the reading matter.

Each letter gives such information as prospective visitors to Hawaii are likely to require, such as travel facilities, hotel rates and the like. In each envelope will be enclosed one of the special postcards, ornamented with a reproduction of the 1910 Floral Parade poster. The envelope will then be sealed with an artistic little "sticker," also displaying the Floral Parade poster in reduced form.

J. Walter Scott, special representative of the Promotion Committee at San Francisco, will have charge of the distribution of posters and literature in the United States, in Canada and in Mexico. To him Mist will send the larger part of both posters and cards, and, after taking such as he may require, he will forward the remainder to the Promotion Committee here.

Even far away Cape Town has not been forgotten in making up the mailing list, and no hamlet of any importance on the face of the civilized globe will be overlooked when posters and literature are sent out.

Twenty-five thousand "stickers," each a reduced facsimile of the 1910 Floral Parade poster, will be distributed for the purpose of advertising next year's carnival. A large portion of these will be passed out to Honolulu folk, with the request that they use them to seal their letters.

Ten thousand postcards, each ornamented with a reduced facsimile of the poster, will also be passed out, and every effort will be made to insure their wide dissemination. Orders for both the cards and the stickers were placed when the posters were ordered.

KALUANUI ROADWAY WILL BE RELOCATED

On Monday morning, Assistant City and County Engineer Chris Willis, will go to Kaluanui beach to set the stakes for the new road. By the first of the month bids will probably be called for, and the worst stretch of the around-the-island road will soon be turned into an excellent stretch of roadway.

The Kaluanui beach road, for a distance of about 3000 feet, is by far the worst piece of road over which motorists have to travel in encircling the island. Quicksand has been a continual menace there, and many cars have been stalled.

The tentative survey made, contemplating elevating the road about eight feet above low water mark, and ballasting it in such a manner that there will be no danger of washouts. A rough estimate places the cost at \$14,000.

CANNED PINES TO SEATTLE FOR HUNGRY FAIR VISITORS

Five hundred cases of pineapples, canned, where loaded into the Matson steamship Hyades yesterday by the Hawaii Promotion Committee to be delivered to the Hawaii representatives at the Seattle Fair. This consignment is intended to meet the great demand of visitors at the Hawaii building where they are served with the sliced fruit at ten cents per plate. The sales of pineapples at the building have been far and away beyond the expectations of the Hawaii commissioners. The pines are collected from various

members of the Pineapple Growers' Association. Fresh ones are constantly going forward both to serve as an exhibit and for purposes of sale.

A fine exhibit of walking canes made from koa and milo wood as well as trays made of wood from the Island of Hawaii were sent forward. Otramba, the corvair, contributed some beautifully polished tables of koa and milo. The Promotion Committee also sent up a thousand books showing fish in all their beautiful colors, and one hundred dozen bend and seed leis were also boxed and shipped. The few that were on hand at the Hawaii building had been sold out rapidly.
